

Good morning

I am writing to you regarding labelling of fruit.

I am alarmed to see gigantic plastic stickers on mangoes. These labels only add to the plastic problem our planet is facing. In fact Loblaw is a major contributor to our plastic problem and I would encourage this company to rethink its business practices regarding its love of plastics. Please think about eliminating/reducing plastic. Personally I prefer to buy fruits and vegetables that are not wrapped in plastic and buying items in glass, tin and paper.

Thank you.
