Subject: It's time ... in fact it's past time

Dear LOBLAW head office,

I do some of my shopping at Loblaws and at your other stores. I am happy that you have added organic food options in your produce department.

And my family and I enjoy many of your products. I also appreciate the efforts that you are making to keep the store safe for employees and customers during COVID 19.

But it's time for you to do better, in fact it's past time.

The world and the oceans are filling up with plastic!

The plastic, petroleum producer industries duped us decades ago into thinking that we could just recycle the stuff.

When in fact much plastic goes into landfills and often is shipped to third world countries where they don't know what to do with it either!

Or plastic is littered on land or ends up in our rivers, lakes and oceans where it breaks up into pieces over time and is ingested by marine life.

So much of this is happening and has happened over decades that we are now eating plastic whenever we eat fish. And neither the fish nor humans are supposed to be eating plastic!!

So while we used to eat Salmon in Aspic, now we unwittingly eat Salmon in Plastic! Not good for our health is an understatement here!

Loblaws customers shouldn't have to buy all that stuff encased in plastic!

Good corporate governance is about more than satisfying you shareholders!

Corporations also have to embrace environmental sustainability and social responsibility!

Do the right thing LOBLAW get rid of single-use plastic!

It's way past time to do this!

Sincerely,
