

Nov 3, 2021

We appreciate you reaching out to us at Silk®.

Here at Silk®, we strive to provide you with the highest quality products, right down to the packaging.

Our main objective is for our packaging to be consumer-friendly and safe. At the same time, we want to make sure that all our standards are met when it comes to quality, aesthetics, and overall integrity.

As a socially and environmentally conscious food company, we encourage consumers to recycle materials whenever possible.

Specific to your inquiry, because paperboard milk cartons contain valuable paper fiber, which can be recovered and used to make a variety of new paper products, cartons are widely accepted as part of many community recycling programs. Further, many schools are now recycling their empty, rinsed milk cartons.

Whether these containers are recycled in your community depends on where you live and the processing capability of your local center. To find out if cartons are recycled in your community go to [www.recyclecartons.com](http://www.recyclecartons.com).

We appreciate your feedback and I'll be sure to pass this over to our packaging folks.

If there is something else we can do to help, let's chat about it! Please give us a call at 1-866-233-5410 between 8 a.m. and 5 p.m. Central Time, Monday through Friday.

Best,  
Genene & The Silk® Team
